

Clinical Training on Specialized Interventions for Individuals with Eating Disorders

Many healthcare professionals have shared their concerns about intervening with an increasingly large clientele suffering from eating disorders (EDs). Indeed, the severity of physical and psychological symptoms associated with EDs, their frequent comorbidities, and the often-characterized resistance to change in this clientele underscore the importance of better understanding the illness and equipping oneself effectively to better assist those who suffer from it. Since 2001, Clinique BACA has been offering a training program for mental health professionals who feel the need to enhance their skills to intervene more effectively with individuals presenting with EDs. Join us for our training; we would be delighted to share our knowledge with you!

Content: A two day training that outlines a wealth of evidence-based information, integrating clinical skills workshops covering psychological, nutritional and medical aspects of eating disorders.

Facilitator: Tania Lemoine, PsyD, MSSW, CEDS,
Founder and Director of the BACA clinic, author of “l’Espoir a table”.

Cost: The total cost for the training is 575\$ plus taxes.
Total of 13 hours of training over 2 days.

Dates: June 14 & 15 2024, or July 12 & 13 2024, or October 4 & 5 2024

Location: 2121 Crescent, Suite 200, Mtl, QC, H3G 1L5

Registration:

In order to reserve your place, please return the enclosed registration form to info@cliniquebaca.com and transfer 300\$ to recevables@cliniquebaca.com, before the deadline (2 weeks before the selected training). The second installment will be due via transfer on the first day of training.
